

FARMNAIJA

SMART FARMIG FOR
NIGERIA'S FUTURE

Empowering young farmers with AI and offline technology
An-open source solution for UNICEF Venture Fund

The problem

The challenge in Nigeria

.70% of Nigerians depend on
agriculture

.Young farmers lack access to
weather info,disease detection
and market prices

Language barrier-Most apps are
only in English

Our solution

Introducing FarmNaija App

FarmNaija is an offline first, AI powered mobile app built for Nigerian smallholder farmers. It works in 4 local languages.

Key Features

1. It work as an AI crop doctor.
Snap a photo of crop, get instant disease diagnosis.
2. It provides rel time weather and marketplace alerts.
3. You can ask question by voice in Hausa, Yoruba, Igbo.

Impact and UNICEF Alignment

Aligned with UNICEF goals

SDG 2:Zero Hunger

SDG 8:Decent work for youth

Directly supports UNICEF's Innovation strategy for rural youth

Potential to reach 5 million farmers in Nigeria

A scenic view of a tea plantation on rolling hills. The tea bushes are arranged in neat, terraced rows that follow the contours of the land. A dirt path winds through the plantation. In the background, there are more hills and some trees under a clear blue sky.

THANK YOU
